
STAD—General Statistics

How to grade?

Mathieu Ribatet

École Centrale de Nantes

-
- Grade by [writing a report](#) that details a [complete statistical analysis](#) of one of the following datasets available from the following (these are hyperlinks so click on it):
 - Players performance in the 6 Nations Tournament
 - Customers leaving their bank
 - Crime in France by Departement
 - Fake bill characteristics
 - Heart failure disease
 - Football players performance in the Ligue 1 according to Fifa22
 - Teams of [4 students](#) and a [short report of 2 pages max](#)
 - Typical outline:
 - Introduces the data and explains what your analysis is about
 - Perform descriptive analysis, a PCA with explanation, a clustering in both original space and the coordinates of your PCA
 - Use a linear and logistic regression model and comment results.
 - Note that you may need more than one dataset to be able to achieve the requirements
